USED FRUIT TREE NURSERY EQUIPMENT FOR SALE

Matt Moser and GraftingSystems™ has been asked to assist in the re-sale of three items of Oliver-Agro nursery equipment. This equipment was purchased new and has been used and maintained by a major fruit tree nursery which is reducing its field growing of fruit trees. This equipment is well suited and set-up for fruit tree nursery production, but could be used for other woody nursery stock production.

If you are interested at all in any of these machines, please contact me and we can discuss your needs. The prices asked are approximately 30% off from new machines delivered into the US.

Please email Matt at Info@GraftingSystems.com or call 269-921-6892. There is also much more information on these machines including videos, brochures, and pictures on the Oliver Agro website: www.oliveragro.com (Click the English flag on the top navigation bar for the English version) and some downloadable pdf brochures on the www.GraftingSystems.com website---go to the Oliver Machinery tab.
